HOT DOG STEAMER

PLEASE READ ALL INSTRUCTIONS BEFORE USE

1. Position the Hot Dog Steamer on a flat, level surface. (Be careful to protect surface from steam.) Plug cord directly into outlet, do not use an extension cord.
2. Add hot water (Distilled water is preferred) to the water pan (in bottom well). Use of hot water will reduce pre-heating time.
3. Turn the thermostat control knob to **HIGH** and turn the steamer on. Wait approximately 30 minutes for the steamer to produce steam.
4. Open the bottom door and line bottom shelf with 3-4 rows of stacked, **defrosted** hot dogs. Stacking too many hot dogs in steamer will increase the warming time. (To speed warming and serving time, pre-cook hotdogs before placing in steamer.) Close the unit and wait approximately 60 minutes for the hot dogs to cook.
5. Lower the thermostat to the 3 or 4 setting, open the door and add the buns to the bun warmer (on top level). Close the door.

After buns are warmed (10-15 minutes) serve hot dogs. ENJOY!!!!

6. Continue to add hot water to maintain steam as necessary.
7. When finished, unplug machine, remove all food, and empty any remaining water.
